

## Project SDG NAVIGATOR - Empowering changemakers towards sustainability

### ABOUT THE PROJECT

The SDG NAVIGATOR project aims to empower individuals to drive sustainability by enhancing their entrepreneurial mindset and skills through innovative vocational education and training (VET). Key outcomes include a Sustainability Changemaker Competences Dictionary, a Sustainability NAVIGATOR Learning Path, and the SDG NAVIGATOR Hub and Toolbox. Targeting VET learners, providers, entrepreneurs, and other stakeholders, the project seeks to amplify individuals' impact on sustainability initiatives through personalized learning approaches and online resources.

The project SDG NAVIGATOR is a Erasmus+ KA2 CP VET financed project. The project duration is 24 months, from 31.12.2022 to 30.12.2024 and is implemented by partners from Lithuania, Portugal, Spain, Greece, Cyprus, Slovenia and Austria.

### FINALIZATION OF PROJECT RESULTS 2 & 3

#### SUSTAINABILITY NAVIGATOR LEARNING PATH (SNLP)

SNLP provides individuals with learning resources and changemaking tools in order to strengthen their sustainability-oriented entrepreneurial competences and guide them through the entrepreneurial process and diverse stages, amplifying and broadcasting their impact. SNLP consists of seven learning modules structured around seven sustainability-driven entrepreneurship stages and related processes, mobilizing the competences in SCCD. The 7 stages/modules are based on a well-known process-oriented framework on sustainability-driven entrepreneurship: get ready, discovery, planning, start-up, build-out, consolidation and outreach.

#### SDG NAVIGATOR DIGITAL HUB & TOOLBOX (SNDH)

SDG NAVIGATOR Hub and Toolbox offer an online open-access platform with learning resources and complementary learning and exploration paths on sustainability entrepreneurship, enabling personalized and action-oriented approaches to learning. SNDH integrates the Sustainability Changemakers Competences Dictionary (SCCD) and the Sustainability NAVIGATOR Learning Path (SNLP), to offer an interactive and personalized exploration of the available resources. It also has a thematic toolbox designed to support educators and consultants in facilitating more dynamic and customized consultancy-training processes on sustainability-driven entrepreneurship, as well as individuals expanding on competences and processes that are critical for them or for the challenges and opportunities they are dealing with.

Project no. 2022-1-LT01-KA220-VET-000087491

The SNDH toolbox contains interactive exercises that are organized and displayed by the process stages defined in the Sustainability NAVIGATOR Learning Path (SNLP) and the competences defined in the Sustainability Changemakers Competences Dictionary (SCCD). The interactive learning resources like storytelling, videos, interactive infographics, action cards, and flashcards, quizzes, etc developed within the Sustainability NAVIGATOR Learning Path (SNLP) can be used in stand-alone mode and customized to individual preferences. This set of attractive, playful, real-world-oriented activities are aimed at supporting further content exploration and application. We recommend these tools and resources as pre- and post-training assessments on the training themes.

The Sustainability NAVIGATOR learning path together with the SDG NAVIGATOR digital hub and toolbox could be easily and freely accessed on the SDG NAVIGATOR website in the following seven partnership languages:

German: <https://sdgnavigator.eu/de/>

Greek: <https://sdgnavigator.eu/el/>

English: <https://sdgnavigator.eu/>

Lithuanian: <https://sdgnavigator.eu/lt/>

Portuguese: <https://sdgnavigator.eu/pt-pt/>

Slovenian: <https://sdgnavigator.eu/sl/>

Spanish: <https://sdgnavigator.eu/es/>

### 3<sup>rd</sup> TRANSNATIONAL PARTNER MEETING

The project SDG NAVIGATOR partners organized their third project meeting face-to-face in Nicosia (Cyprus) on 30<sup>th</sup> and 31<sup>st</sup> of January 2024. The transnational meeting encompassed agenda presentation, updates on communication, and dissemination efforts, followed by presentations on Work Packages 2 and 3 results. Discussions covered piloting, Work Package 4 progress, and platform development. After lunch, participants of the meeting enjoyed free time or a city walk, followed by dinner. The next day included a study visit, workshop on communication strategies, and activities like impact assessment and quality evaluation. The meeting concluded with addressing any remaining questions or concerns, fostering collaboration and decision-making for project advancement. The scheduled meeting responsibility relied on a partner from Cyprus, i.e. CARDET. The next transnational partner meeting will be organized virtually/online by Meta4 Innovations on 10<sup>th</sup> May 2024.

To communicate effectively with persons and organizations outside our consortium, the SDG NAVIGATOR project creates a social media presence. The project website has further details about the project, the outcomes, newsletters and events: <https://sdgnavigator.eu/>
